

Performance Improvement Plan - Review

Name:

Date: ____015/12/2020____

AREA OF FOCUS/OBJECTIVES/ACTIONS	PROGRESS
<p>To be able to articulate the characteristics of and use cases for:</p> <ul style="list-style-type: none">• Functions• Scope• Arrays• Loops• Objects• DOM• DOM Events & Listeners• Requests	<p><i>You can clearly articulate all of the focus areas and understand how all these parts can work together to create different solutions.</i></p> <p><i>Spend a little more time on the DOM and Requests just to make sure you fully understand their capabilities.</i></p>

Show and write examples for:

- Functions
- Scope
- Arrays
- Loops
- Objects
- DOM
- DOM Events & Listeners
- Requests

And be able to use these tools in proposed tasks without the aid of support.

You can write functions and arrays and you understand the limits of local and global scopes. You can also write out loops and objects correctly.

However, when putting these together, it's clear you haven't worked with them enough to be able to write them out properly. Again, try not to guess and use the same logic you apply in isolation when you bring them together.

As I said before,. It's ok to look stuff up when you need to as every developer does. But the fundamental syntax needs to be ingrained in order for you to understand your code going forward and debug errors.

It's not clear you can write out DOM getters and settings or work with event listeners without help or constant referencing. Focus on these areas to fill in the gaps.

Demonstrate an ability to problem solve in the same key areas and offer solutions to problems using what has been learnt

You have made good progress with the task but I think it would be beneficial for you to tackle the task again, to test yourself and not rely on other's help.

Again, there's no real logic notes used to display your thinking. Make sure you are writing out your logic as part of the task. I want to see that you are planning and mapping out your work. The more time you put in up front the more the code will write itself.
